About This Game

You open your eyes, slowly and painfully, as a dull throb pounds inside your skull. All around you is darkness accompanied by an overwhelming silence. There is a weight in your lap as you squint into the darkness revealing nothing but what seems to be the hospital bed you are lying in and the cold, metallic glint of a flashlight's metal casing.

You reach down anxiously, taking the flashlight in hand and trying to take comfort in its ambient glow. Your surroundings reveal nothing. A room. Cold. Dark. Lonely.

"Caution: This bunker has been evacuated. All occupants are instructed to make their way to their nearest assigned exit and to follow the instructions of security. Caution..."

It repeats its soulless instruction and the sickly feeling of dread coils in your stomach as you take your first steps forward. Your thoughts struggle to make sense in your head but instinct tells you that things are about to get worse...

Finding your way out of the bunker will not be as easy as you think; defended by numerous security systems, your journey is going to be a dangerous one. Sure, you could try to activate the shutdown sequences... As long as you can solve the puzzles required to do so.

You are alone. Defenseless. Confused. But then, for you, it was always this way...

Countless Rooms of Boredom

Such a waste of unreal engine powers.

You do nothing but wander around cluelessly, telling from the point of view, you are the midget, abandoned in the hospital. Nothing is going on.

You just go from one room to another, receiving rare screamers and sometimes white floating sphere. The one and only good thing is that *original* main menu, where you go around the room and press buttons for settings.
You also go through most of the objects in this game :|

This game is bad, you can buy it on 90% sale to sell cards.. Just another trash game to earn money by selling Trading Cards.. The options menu Is dreadful.

The game its self feels unbelievably repetitive after you walk throught the fifth door or so. Not worth the Price. Don't buy this unless you don't mind losing out.. pretty good game. The game seems like it should still be in alpha. There are many textures that seemed lazy, such as the yellow\/black maps to avoid fire rooms. You can also clip inside any object that moves around the room. The game looks like a bad garrysmod map.

Aside from those issues, the games atmosphere never really hooked me. It attempts to be "spooky" in most rooms and it just isn't. There is also no clear objective to the game.

Definitely save your money on this one.. Haven't played long into it, but regardless of no weapons or enemies, if you immerse yourself into the atmosphere, you can still get spooked by the psychological aspects of it. Only issue I have is the game seems to frameskip which is quite odd.. This is an incomplete game..
You keep going through doors..to chambers (rooms)
& you keep on visiting the same rooms...

Dev(s) need(s) a high 5 on his\/them face(s). Haven't played long into it, but regardless of no weapons or enemies, if you immerse yourself into the atmosphere, you can still get spooked by the psychological aspects of it. Only issue I have is the game seems to frameskip which is quite odd.. I really did not find this game enjoyable. I purchased it with only one review written which was my mistake. The game is nothing more than walking through a maze of doors solving a couple simple puzzles to get keys to the next maze of doors and on and on. No interesting storyline to accompany you through the dread either. I found it to be a boring chore to play. In fact, I did not even finish it due to lack of interest. Countless rooms of boredom. What is even more disturbing is that this game is actually on Steam and costs money. I find this to be worse than downloading a virus. Stay away. Stay very far away.
