A bit of a learning curve, but very fun! After playing a single map for a long time and building up lots of gnomes, the game gets a little slow and the frame-rate drops. I believe this game is running on a single thread. If it were multi-threaded I would enjoy it a lot more. I really want to make a massive town, but once I cross 35 gnomes the game becomes really frustrating. I am building a new PC, upgrading from a FX-8150 to a Ryzen 2700X. I am hoping the massive increase to single thread rating will allow me to fulfill my Gnomoria dreams.
